

LOADING A BOOKSHARE BOOK ONTO A NOOK

The Nook book format is EPUB. Bookshare books need to be converted to this format in order to be able to be put into the Nook. We use the Calibre e-book software to make the conversion <http://calibre-ebook.com/> . Install this on your computer before downloading the Bookshare books.

When you first open Calibre, it will ask you if you want to specify a certain e-book reader. Choose the Nook.

1. Download Bookshare Book (Daisy book)
2. Unzip Bookshare Book
3. Right Click on the .xml version of the book
4. Select Open with, and choose Firefox (Internet Explorer will not work for this)
5. Save Page as "Web Page, Complete". Select the folder where the xml book is stored.
6. Close everything out and open Calibre.
7. Select "Add Book", then find the folder where the converted book is (it will have the Firefox icon)
8. Select convert book, then choose the EPUB format
9. Plug in the Nook. The Icon Bar on Calibre will change; then select Add to Device. Watch the lower left hand part of the Calibre screen to view the syncing process. When it's finished, go back to the Device and eject it.
10. The book is on the Nook and you are ready to read!
